

**March 17, 2020 3pm**

Good afternoon PGUSD Families,

Apologies for a second email, however we just received the two attachments from the Monterey County Office of Education that may help answer some questions.

We also wanted to provide a quick Technology Update

Chromebooks are being distributed based on need. In most cases, it's one per household. But we have also checked out multiple chromebooks per parent (household). The survey we are using asks parents how many devices they need to ensure that every child in the home has what they need to complete their schoolwork when they need to.

We are currently finishing the purchase contract for a set of mobile wifi hotspots for those families that indicated through our survey that they lacked reliable wifi access at home. We expect to receive these wifi kits by Thursday this week. Once we take delivery of them, we will reach out to the parents that have indicated a need.

Thank you again & stay safe,

Ralph Porras  
Superintendent
